

Chemical Monitoring of Coastal Environments

Summer School 24

September 30th to
October 11th, 2024
Nantes, France

Gain scientific knowledge and practical guidelines in
sampling, marine chemical data analysis and
interpretation for marine coastal chemical monitoring

PhD students, Postdoc Fellows, Master level permanent staff from [ODA](#) recipient countries

2 Field trips

Le Croisic coast and along
the Loire estuary

- Sampling of sediments, molluscs & seawater

Laboratory activities

- Sample preparation and analysis
- Data treatment

Lecture topics

- Biogeochemistry
- Ecotoxicology
- Phytoplankton
- Sampling strategy
- Analytical Procedures
- Observation Network Management
- Science based Policy Support
- Environmental Quality Assessment
- Chemical Risk Assessment
- Environmental Psychology
- Scientific Mediation

Week 1

Out in the
Field!

Discover Nantes
through the
Green Line!

Week 2

FREE registration, accomodation and food during the Summer School!
Support for travel cost available (up to 1200€/ trainee)
